

# ABSTRACT OF SANITARY REPORTS.

VOL. VII.

WASHINGTON, D. C., MARCH 11, 1892.

No. 11.

[Published at the Marine-Hospital Bureau in accordance with act of Congress of April 29, 1878.]

## UNITED STATES.

### SPECIAL REPORTS.

*Report on typhus fever patients at New York.*—The following dispatch has been received at this Office:

NEW YORK, N. Y., March 9, 1892.

One hundred and fifty-three cases to date. Thirteen deaths. Eighty-two in one hospital at present.

CYRUS EDSON, M. D.,  
Chief Inspector.

*Completion of wharf, etc., at Key West Quarantine Station.*—Under date of February 29, 1892, Assistant Surgeon Geddings reports the completion of the wharf and causeway at the Key West Quarantine Station, Dry Tortugas, Florida.

*Infected vessel at South Atlantic Quarantine Station.*—Acting Assistant Surgeon Disney writes as follows, under date of February 27, 1892:

I have the honor to report the arrival and inspection to-day of the Norwegian bark *Ornen* from Santos, in ballast to Tybee for orders.

The mate died after three days' illness from yellow fever at hospital in Santos. The captain declares there has been no sickness of any kind aboard since.

With the exception of the boatswain, a new crew was shipped at Santos. The vessel is clean for her age and usage. The crew are all well. She will await orders here, and meanwhile undergo disinfection.

### *Reports of States, and yearly and monthly reports of cities.*

FLORIDA—*Pensacola*.—Month of February, 1892. Population, 11,750. Total deaths, 24, including phthisis pulmonalis, 3; influenza, 1; and enteric fever, 3.

INDIANA—*Evansville*.—Month of February, 1892. Population, 50,756. Total deaths, 72, including phthisis pulmonalis, 9; influenza, 8; and diphtheria, 4.

IOWA—*Keokuk*.—Month of February, 1892. Population, 14,101. Total deaths, 19, including phthisis pulmonalis, 2; influenza, 2; diphtheria, 1; and croup, 4.

KENTUCKY—*Louisville*.—Month of January, 1892. Population, 161,129. Total deaths, 470, including phthisis pulmonalis, 38; influenza, 48; enteric fever, 10; scarlet fever, 3; diphtheria, 12; croup, 8; and whooping cough, 1.

Month of February, 1892. Total deaths, 263, including phthisis pulmonalis, 34; influenza, 10; enteric fever, 6; scarlet fever, 1; and croup, 1.

MICHIGAN.—Week ended February 27, 1892. Reports to the State board of health, Lansing, from 66 observers, indicate that dysentery, measles, whooping cough, typho-malarial fever, inflammation of kidney, diphtheria, and scarlet fever increased, and that cholera morbus, cholera infantum, membranous croup, pleuritis and remittent fever decreased in area of prevalence.

Diphtheria was reported present during the week at 26 places, scarlet fever at 51, enteric fever at 15, and measles at 10 places.

Month of February, 1892. Reports from observers, compared with the preceding month, indicate that cholera infantum, measles whooping cough, cerebro-spinal meningitis, and cholera morbus increased, and dysentery, typhoid fever, typho-malarial fever, pneumonia, and inflammation of bowels decreased in prevalence.

Compared with the average for the month of February, in the six years, 1886-1891, cholera infantum, cholera morbus, membranous croup, and influenza, were more prevalent, and smallpox, typho-malarial fever, inflammation of brain, measles, typhoid fever, whooping cough, dysentery, intermittent fever, remittent fever, inflammation of bowels, diarrhoea, and diphtheria were less prevalent in February, 1892.

Including reports by regular observers and others diphtheria was reported present in the month of February, 1892, at 60 places, scarlet fever at 100, typhoid fever at 32, and measles at 21 places.

Reports from all sources show diphtheria reported at 10 places less, scarlet fever at 7 places less, typhoid fever at 8 places less, and measles at 8 places more than in the preceding month.

*Grand Rapids*.—Month of February, 1892. Population, 60,278. Total deaths, 86, including phthisis pulmonalis, 11; enteric fever, 2; scarlet fever, 1; diphtheria, 2; and influenza, 2.

NEW YORK.—Month of January, 1892. Reports to the State board of health from eight districts, including New York City, Brooklyn, and 147 other cities and towns, show a total of 13,460 deaths, including phthisis pulmonalis, 1,286; smallpox, 2; enteric fever, 116; scarlet fever, 294; diphtheria and croup, 650; measles, 80; and whooping cough, 48.

The following is extracted from the *Monthly Bulletin* of the State board of health for January :

The mortality of January is greater than that of any month previously recorded except that of April, 1891, which it nearly equals ; it arose from a daily average of 291 deaths in November, of 362 in December to one of 434, exceeding the daily average of January, 1891, by 126 deaths, and that of the entire year 1891 by about 100 deaths. The increase is due to epidemic influenza, what may be termed the third outbreak of which reached its height during this month. Compared with January, 1890, and April, 1891, the two months of the height of previous epidemics, the mortality in early life is less, while that of old age seems to be much greater ; from acute respiratory diseases, and also from consumption, the number of deaths is considerably less than in either of the other months. Deaths attributed to diseases of the digestive and circulatory systems are increased ; compared with previous outbreaks, this one has appeared to fall especially upon the aged, the number of deaths of old people being double that of the average for January, and next to that upon diseases of the digestive and circulatory organs. From zymotic diseases the total mortality is greater than in the two months of previous prevalence of influenza, but is less than in December, 1891, the diminution being in diphtheria mainly. Scarlet fever shows a moderate increase. During the month one fatal case of smallpox of obscure origin occurred in Canarsie, Kings County, and one death was reported from New York. Typhus fever, brought by Russian Jews, emigrants on the steamer *Massilia* developed in New York, where over one hundred cases have occurred up to February 25, at Valatie, in Columbia County, and in Newburgh, being, however, limited thus far almost entirely to the emigrants importing it.

*Buffalo*.—Month of January, 1892. Population, 255,664. Total deaths, 483, including phthisis pulmonalis, 45 ; influenza, 23 ; enteric fever, 4 ; scarlet fever, 5 ; diphtheria, 29 ; croup, 27 ; and whooping cough, 1.

*NORTH CAROLINA*.—Month of February, 1892. Reports to the State board of health, Wilmington, from 20 towns, having an aggregate population of 101,570, show a total of 159 deaths, including 9 from phthisis pulmonalis.

*OHIO—Cincinnati*.—Month of February, 1892. Population, 296,908. Total deaths, 583, including phthisis pulmonalis, 60 ; influenza, 27 ; enteric fever, 9 ; scarlet fever, 5 ; diphtheria, 31 ; croup, 6 ; and whooping cough, 1.

*Dayton*.—Month of February, 1892. Population, 61,220. Total deaths, 82, including phthisis pulmonalis, 16 ; influenza, 1 ; enteric fever, 2 ; diphtheria, 1 ; and croup, 1.

*TEXAS—Galveston*.—Under date of February 27, 1892, Assistant Surgeon Smith reports one case of diphtheria admitted to the United States marine hospital at the above-named port.
